Objective

Aspiring Computer Science student interested in web development and problem-solving, seeking to build impactful applications and grow through challenging technical roles.

Education

Lovely Professional University Jalandhar, Punjab

Bachelor of Technology in Computer Science and Engineering, CGPA: 5.57 2026

Relevant Coursework: Data Structures and Algorithms, Web Development, Database Management Systems, Operating Systems

Kendriya Vidyalaya

Senior Secondary School (12th), Percentage: 75.4% 2022

Kendriya Vidyalaya

Secondary School (10th), Percentage: 85.6% 2020

Technical Skills

Programming Languages: Java, C, C++, Python, SQL

Tools/Technologies: Git, MySQL, Postman, Power BI, Figma

Frameworks: React.js, Node.js, Express.js, Tauri

Databases: MySQL, Supabase

Libraries: React Query

Projects

Project Title: Axiom – Personal macOS Study Infrastructure (Desktop App)

Description: A private, native macOS application I engineered to solve my own fragmented study tracking. Built as custom internal tooling with a hierarchical curriculum organizer, it logs my deep-work sessions directly from the system tray and visualizes my progress through zero-latency, offline-first analytics. Resolved complex state synchronization using React Query and integrated a Supabase backend for data consistency.

Technologies Used: React.js, React Query, Supabase, Tauri, SQLite

Impact/Achievements: Deployed as a private native macOS desktop application using Tauri, delivering a highly performant, offline-capable analytics tool to optimize personal study workflows. active prototype demonstrating end-to-end user flows for time planning and task prioritization.

Project Title: Blackwood – Private Desktop Guitar Companion

Description: A personal, native desktop training suite I built to drive my own guitar progression from foundational chords to advanced mastery. Engineered entirely for my own workflow, it features real-time mic-input chromatic tuning, Web Audio API-powered ear trainers, and detailed practice analytics to track daily achievements.

Technologies Used: React.js, Tauri, Tailwind CSS, Web Audio API, Vite, Recharts **Impact/**

Achievements: Built and deployed a standalone desktop application leveraging the Web Audio API for real-time audio analysis, creating a custom curriculum and gamified progression system for self-learning

Certifications

Introduction to ChatGPT-4 Prompt Engineering: Coursera (2025)

Build Generative AI Apps: Coursera (2025)

Computational Theory: Coursera (2025)

Think Design Prototype (Figma): LPU (2025)

Responsive Web Design: FreeCodeCamp (2023)

Achievements

Solved 30+ problems on LeetCode

Top performer in school-level coding assessments

Built multiple full-stack and frontend projects including a native desktop application
